Product Concern Report

This document is to be used to report shortages, installation difficulties, product concerns, etc. encountered during installation or servicing. Prompt reporting will enable us to address the situation quickly.

Model and Serial numbers MUST be provided.

Model Number:______________________________________________

Serial Number:______________________________________________

If the difficulty involves the power unit or parts box, the following numbers Must be provided:

Power unit serial number:_____________________________________

Clock number from parts box load list:___________________________

Number from Bolt bag check list:_______________________________

Description of concern(s):____________________________________
________________________________________________________________
________________________________________________________________
________________________________________________________________
________________________________________________________________

(If additional space is required, please use separate sheet)

Container/Box Damaged:_______________________________________

Installation Location:Name:_____________________________________

Address:_____________________________________________________

City and State:_______________________________________________

Submitted by:_______________________________________________ Date:________________

Company:____________________________________________________

Phone Number:_______________________________________________ Fax:________________

Email address:________________________________________________

Please Print Clearly. For Prompt Attention,
Fax to 1.800.822.6502 or 812.273.6502  **ATTN: Quality Department**
or Email: CustomerService@rotarylift.com
IMPORTANT SAFETY INSTRUCTIONS

When using your garage equipment, basic safety precautions should always be followed, including the following:

1. Read all instructions

2. Care must be taken as burns can occur from touching hot parts.

3. Do not operate equipment with a damaged cord or if the equipment has been dropped or damaged - until it has been examined by a qualified service person.

4. Do not let a cord hang over the edge of the table, bench, or counter or come in contact with hot manifolds or moving fan blades.

5. If an extension cord is necessary, a cord with a current rating equal to or more than that of the equipment should be used. Cords rated for less current than the equipment may overheat.

6. Always unplug equipment from electrical outlet when not in use. Never use the cord to pull the plug from the outlet. Grasp plug and pull to disconnect.

7. Let equipment cool completely before putting away. Loop cord loosely around equipment when storing.

8. To reduce the risk of fire, do not operate equipment in the vicinity of open containers of flammable liquids (gasoline).

9. Adequate ventilation should be provided when working on operating internal combustion engines.

10. Keep hair, loose clothing, fingers, and all parts of body away from moving parts.

11. To reduce the risk of electric shock, do not use on wet surfaces or expose to rain.

12. Use only as described in this manual. Use only manufacturer's recommended attachments.

13. ALWAYS WEAR SAFETY GLASSES. Everyday eyeglasses only have impact resistant lenses, they are not safety glasses.
